

How does **TRITEMP™** differ from other non-contact thermometers?

The pandemic has resulted in numerous non-contact thermometers becoming available in the marketplace.

TRITEMP™ offers superior quality:

- Two year breakage warranty on all devices
- Effective for minimum 40,000 temperature measurements
- Less than 0.5% breakage rate
- Calibration checker unit available
- Accuracy to +/-0.2°C (equivalent to internal body probe)
- CE marked and manufactured in Europe
- Readings in less than one second
- Easy to use, simply TAP & TAKE
- Comprehensive training and support provided
- Medically graded - made with nurses in mind
- Used in 21 countries across the globe

* Provided the device is not damaged and has been used in accordance with the IFU
^ of all devices sold in 2020

**Thermometers
are used
in every hospital
in every ward,
on every patient.**

Quality is therefore of paramount importance. Breakage will lead to inflated costs over time, and many hospitals switch to TRITEMP™ after using alternatives.
